

Spirit Lantern

Introduction

The Spirit Lantern, model BP-LNTRN is an innovative REM-Pod designed to resemble a vintage outdoor hanging lantern. This unique device features three distinct operational modes to cater to various usage scenarios.

The Spirit Lantern is powered by a rechargeable lithium battery, capable of providing more than 8 hours of continuous use on a single charge.

Setup and Usage

Setup is simple and easy, turn the power knob on and turn knob to desired flicker rate or brightness. Spirit Lantern is ready to use. Switch modes by quickly turning the power knob off and on. Modes, listed below will switch with each cycle.

Modes

- **Flame:** Vintage flame look, turn the power/rotatory knob to adjust the flicker rate.
- **3000K:** Cool White glow, brightness adjustable by turning the power/rotatory knob.
- **Dark:** Lantern is dark and only lights up when triggered.

Recharging

The USB charging port is located beneath the power switch knob. To charge the Spirit Lantern, please utilize the provided USB cable. Please note that the recharge time may vary depending on the amperage of the charger used, typically ranging from 2 to 4 hours.
