

## Stogiepod

### Introduction

The Stogiepod is a cutting-edge, single-LED rempod designed to provide extended battery life, with a 2600mAh Li-Ion rechargeable battery offering approximately 5 times the battery usage of a standard 9-volt battery. This innovative device is designed to resemble a cigar box, complete with an ashtray that serves as the trigger antenna.

The Stogiepod features two modes of operation: Silent Mode and Audible Mode. In Silent Mode, the cigar tip glows red when triggered, while in Audible Mode, the device emits an audible tone and the cigar tip glows red when triggered. Pictured is the custom design with no sound which customer requested. Sound will be included on all future sales unless customer purchasing requests no sound.

The Stogiepod's box does not open it is just a "memory" trigger for spirits plus it holds the electronics and battery.

### Setup and Usage

Setup is simple and easy, Push the power button on the side to your desired mode. Stogiepod is ready to use.

### Modes

- **Normal:** Audible tone and cigar LED are enabled
- **Silent:** Audible tone disabled and Cigar LED is enabled

### Recharging

The charging port is located beside the power switch. To charge the Stogiepod, please utilize the provided 8.4Vdc power supply. Red LED on the power supply indicates the batteries are charging. Green LED Stogiepod is fully charged.
